

Claims

- [c1] A system configured to facilitate the transmission of messages from a seller to a supplier comprising:
 - a seller application;
 - a supplier application;
 - a web application coupled to the supplier application;
 - and
 - a proxy application coupled between the seller application and the supplier application, wherein the proxy application is configured to encrypt/decrypt and transmit data from the seller application to the supplier application.
- [c2] The system of claim 1 wherein the seller application is a web services application.
- [c3] The system of claim 1 wherein the proxy application is configured to facilitate transmitting data using SOAP and HTTP between the seller application and the supplier application.
- [c4] The system of claim 1 wherein the supplier application is configured to facilitate exchanging information with one of the seller application and the supplier application.

- [c5] The system of claim 1 wherein the proxy application facilitates transmitting information using an XML format.
- [c6] The system of claim 5 wherein the XML format is a SOAP message conforming to the WSDL.
- [c7] The system of claim 1 wherein the system facilitates transmitting information related to the sale of travelers checks.
- [c8] The system of claim 1 wherein the system facilitates transmitting information related to the sale of prepaid services.
